# PROFILE

# MILESTONE

COMPANY

## One passionate man? 100% confidence.

Founded by one passionate engineer in 1991, Simota racing sports has developed a dedicated staff with the extensive knowledge base and solid skills acquired by training and experience. Over the years, Simota has introduced several industry-leading products, which were later followed by even other famous brand. This is why we have 100% confidence in providing innovative, state-of-the-art air intake systems and complete service for our customers.

## Engineered to breathe like never before

Our R&D team is very professional and experienced for design and developing the air intake systems and stock replacement air filters. With continuous technical innovation, we have introduced many innovative products to the market. We have also extended our product line into other auto accessories as well.

## Patents & Copy right

We pursue patent protection for our innovations. Along with the customer satisfaction, Simota is committed to provide the best products and services to meet customers' need.

## Established since 1991

- 1999- The mass production of cold air intake system, Carbon fiber intake system, air filters.
- 2001-Sport Truck kits were approved by well-known customers in the world and start to mass production.
- 2002- Aero intake system was released and mass production.
- 2004-The production of process of Urethane filter got the patent and mass production.
- 2005-Simota was certified TUV.ISO 9001
- 2006-The air filter, foam filter and oil filter of Motorcycle released.
- 2008-Launching of Maha LPS3000 four-wheel chassis dynamometer
- 2009-Shark carbon air intake with patent was released, Universal air intake DRAGON and Air Storm series mass production.

## Company Sketch

- Factory Area: 71,167 square feet
- Annual Sales Revenue: USD 7 million
- Capacity: 600,000 sets / year
- Employees: 100
- R&D Staff: 10

## Sales Markets Breakdown

- America
- Europe
- Asia
- South America
- Oceania

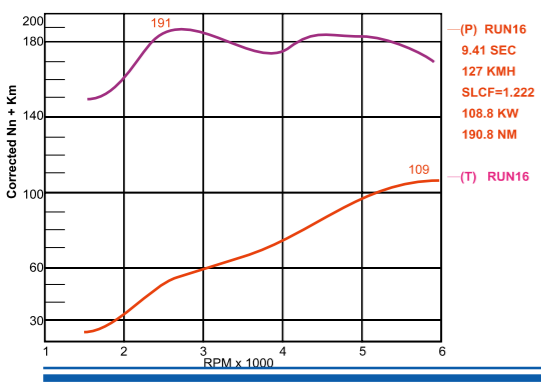

COMPANY

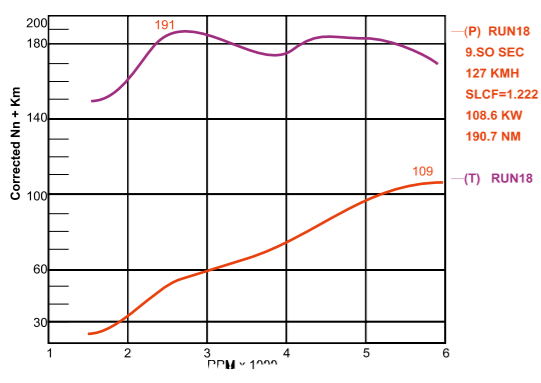

COMPANY

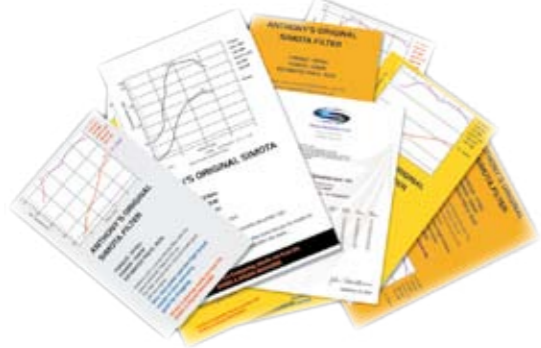

**SIMOTA CONE FILTER**  
**TORQUE: 191Nm**  
**POWER: 109KW**  
**ESTIMATED PRICE: R25**  
 The same filter as Anthony's original one but without the optional heat shield. It was cleaner than Anthony's and was tested long after his one. The good thing is that it got exactly the same readings which goes to show that things were being done right.  
**Top power and top torque for bargain price.**

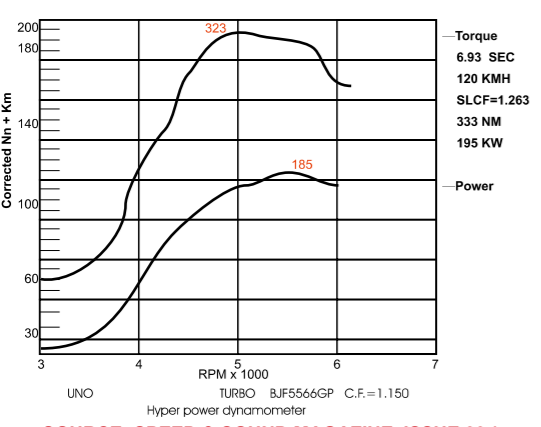

**ANTHONY'S ORIGINAL SIMOTA FILTER**  
**TORQUE: 191Nm**  
**POWER: 109KW**  
**ESTIMATED PRICE: R250**  
 Anthony had a normal Simota filter with the extra heatshield fitted to the car. The filter sounds damn nice and looks good with the extras.

SOURCE: SPEED & SOUND MAGAZINE, ISSUE 29 / www.speedandsound.co.za

Tests performed on the same base Tiburon. Filters were of the same size and were intended by their respective manufacturers for the same application. Manufacturers including BMC, PPR, K&N, Autostyle, Pipercross, Simota and others. **Guess what? Simota is ranked as No. 1!**

**JEDI'S ORIGINAL SIMOTA**  
**TORQUE: 323Nm**  
**POWER: 185KW**  
**Peak @ 6.93 sec**  
**ESTIMATED PRICE: N/A**  
 Jed's filter of choice. Decent torque but the kilowatts are pretty high. Nice smooth curves too.  
**This is a good budget filter that does the job it's made for.**  
 Maybe he'll change his mind after the tests...

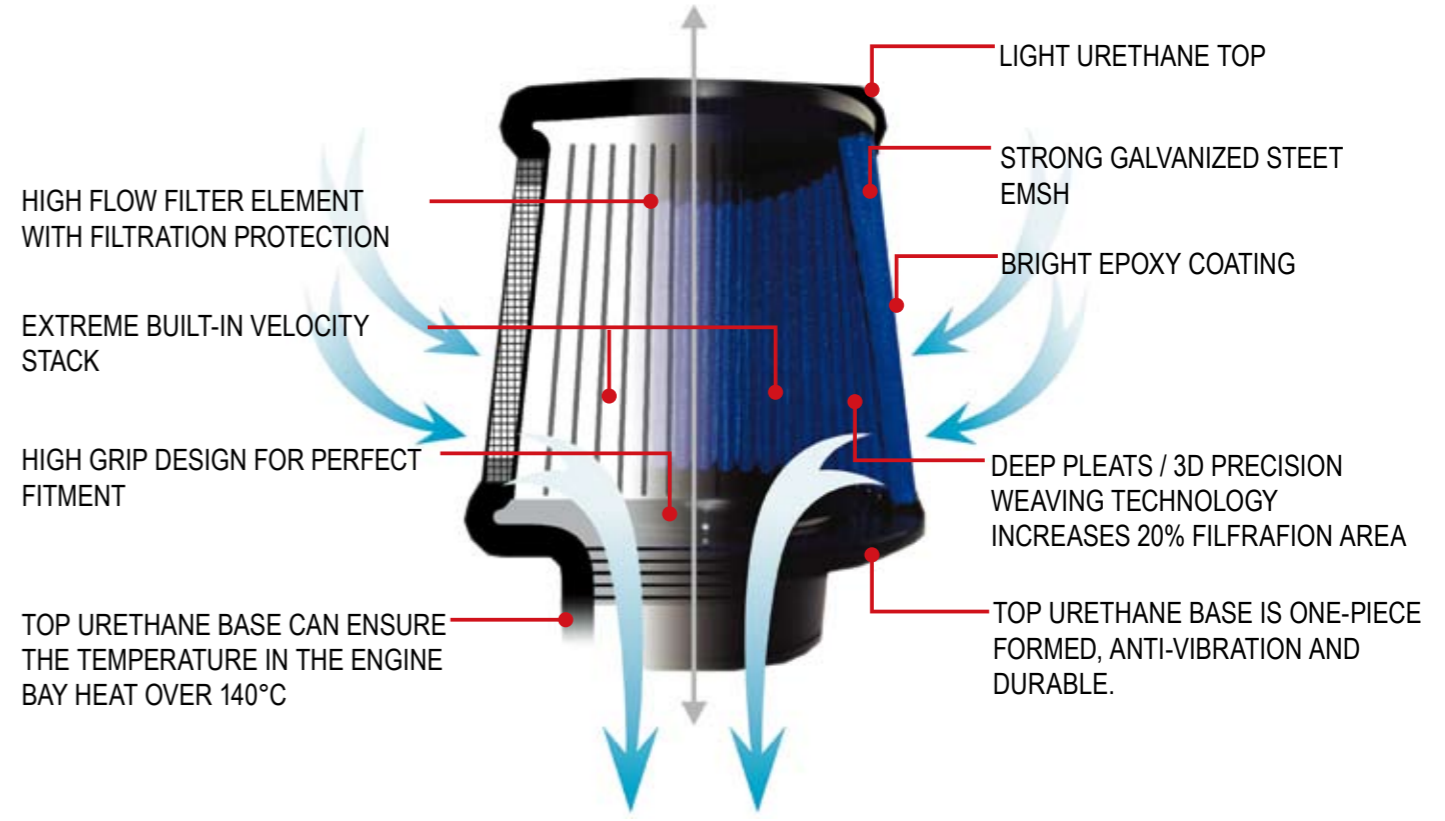

SOURCE: SPEED & SOUND MAGAZINE, ISSUE 30 / www.speedandsound.co.za

Test on Fiat Uno Turbo at Jedi Motorsport, 75 Hay Street, Rosettenville, S.A.

**URETHANE FILTER SOME AIR IS GOOD, MORE AIR IS BETTER**

Following is pretty easy.....  
 Leading however, demands so much more...  
 Simota is proud to introduce the true performance filter elements.  
 "Tried and true" The Simota High Flow Filter features test-proven, maximum air flow rate with superior filtration protection. K&N used to be the leader in the industry, but if you still think so, think again!

*John Caldwell, president*  
 September 25, 2003

Test Note: Testing performed on a computerized precision flow bench by Caldwell Development Inc., based in Vista, California, USA. (http://www.caldwelldevelopment.com) All filter elements were flow tested at the same H2O restriction by using the square law formula. All filter elements tested were of equal size and were intended by their respective manufacturer for the same application.

**FACT: Simota outflows K&N and AEM.**

**and this is THE AIR FILTER!**  
SIMOTA urethane air filter 360gm

**Trimming down by 39%!**

## Comparison Between Traditional Air filter & SIMOTA Urethane Air Filter

	Traditional Air Filter	SIMOTA urethane air filter
<b>Warranty</b>	• NO one can	• Million miles warranty!
<b>Weight</b>	• Heavy	• Extremely lightweight
<b>Appearance</b>	• Soft aluminum mesh deforms easily • Old style	• Strong galvanized steel mesh coated with Epoxy • Bright, dashing look • Anti-Rust
<b>Condition</b>	• Not good for use in bad condition (very cold / hot) or vibration environment • The filter body is easy to be separated from the bas	• It is impossible for the filter body to fall off from the filter base under all circumstances

# AIR FILTERS COMPARISON TABLE

## DURABILITY COUNTS

CONDITION: In summertime, the actual temperature in the engine bay could surge up to almost 302°F (almost approx. 150°C). If you drive a long, long upward road, that is closely the same situation.

TESTING PROCEDURE: We test the durability of 2 Simota urethane filters along with the other five filters competitors.

Our staff put all these filters into an oven to see if these filters can endure extreme heat.

RESTLT: Only Simota passes through with flying colors. You can see the right chart and the fact is: Simota heads the list.

What if your filter simply melts down under heat like other big names? That's where durability counts.....

Simota URETHANE Filter is your best choice.

## See the real stuff that lasts longer

Duration & Temperature in Oven	Rubber base filter	G brand	J brand	K brand	Abrond	Simota
1 hour at 100°C(212°F)	X out	survied	survied	survied	survied	survied!
1 hour at 120°C(248°F)	X out	 The structure melts	 The base melts, the cap falls off	The base deforms	survied	survied!

Comparison, between SIMOTA's Urethane Air filter & "K" Brand Filter

SIMOTA's Urethane Air filter

"K" Brand Filter

ONE-PIECE FORMED

INFRINGEMENT OF GLLUE

Brand	SIMOTA's Urethane Air Filter	"K" Brand Air filter
Category		
Cap and Base Construction	Strong galvanized steel mesh with bright epoxy coating simply demonstrates functional beauty!	Soft aluminium mesh not only suffers form erosion, but also deforms easily when applied to turbo / high revving engines.
Quality Control	For ordinary & profesoral purpose	Regular Spill-over rubber compound decreases filtration surface as much as 20%.
Raw Materials & Compound	The optimized formula for SIMOTA's urethane construction ensures perfect airtightness with the intake pipe.	Easily air loose
Price	Competitive priece	High

AIR FILTER

## NOW-WOVEN FABRIC (EPOXY RESIN)

SIMOTA urethane air filter 360gm  
Traditional air filter 590gm  
Trimming down by 39%!

STRONG GALVANISED STEEL MESH BRIGHT EPOXY COATING

HIGH FLOW FILTER ELEMENT WITH FILTRATION PROTECTION

DEEP PLEATS / 3D PRECISION WEAVING TECHNOLOGY INCREASES 20% FILTER AREA

EXTREME BUILT-IN VELOCITY STACK

HIGH GRIP DESIGN FOR PERFECT FITMENT

TOP URETHANE BASE IS ONE-PIECE FORMED, ANTI-VIBRATION AND DURABLE / TOP URETHANE BASE CAN ENSURE THE TEMPERATURE FROM ENGINE BAY HEAT OVER 140°C

Simota Racing Sports is a manufacturer exporter specializing in high power intake system and car/motorbike air filters with Formula 1 grade technology

### Features:

Advanced polyurethane filter construction for lightweight and durability.

Temperature range from -30°C to 150°C (-22°F-302°F).

Strong galvanized steel mesh coated with bright Epoxy.

Unique 3D Precision Weaving Technology for constant, superior filtration.

More, deeper pleats for larger filtration surface.

Cleanable and reusable.

	Traditional Air Filter	SIMOTA urethane air filter
<b>Warranty</b>	•NO one	Million miles warranty!
<b>Weight</b>	•Heavy	Extremely lightweight
<b>Appearance</b>	•Soft aluminum mesh deforms easily •Old style	Strong galvanized steel mesh coated with Epoxy Bright, dashing look Anti-Rust
<b>Condition</b>	•Not good for use in bad condition (very cold / hot) or vibration environment •The filter body is easy to be separated from the base	It is impossible for the filter body to fall off from the filter base under all circumstances

## Comparison Between Traditional Air Filter & SIMOTA Urethane Air Filter

### Features:

Made of #304 stainless steel, with high hardness, corrosion resistant, one-piece formed, requiring no replacement at all, and environmentally friendly!

Temperature range from -30°C to 150°C (-22°F-302°F).

It only needs to be washed with water once every 10,000 kilometers.

The unit's strong flexibility also enables it to withstand high-pressure water jet during washing, suitable for long-term use and cost-effective.

Unique 3D Precision Weaving Technology for constant, superior filtration.

More, deeper pleats for large filtration surface.

Cleanable and reusable.

Mini Air filter relieves your engine of positive crankcase pressure and recycled carbon vapors from your engine, which cause loss of throttle response due to build-up on the throttle body. By venting the vapors into the atmosphere, the Mini Air Filter helps resolve that problem. SIMOTA specially develops various of bolts for mini air filter the different neck diameters. You can now easily install the mini air filter on however hard or soft tube.

# URETHANE AIR FILTER

## STAINLESS-STEEL STOCK REPLACEMENT AIR FILTER

Features:

- Made of #304 stainless steel, with high hardness, corrosion resistant, one-piece formed, requiring no replacement at all, and environmentally friendly!
- Temperature range from -30°C to 150°C (-22°F~302°F).
- It only needs to be washed with water once every 10,000 kilometers.
- The unit's strong flexibility also enables it to withstand high-pressure water jet during washing, suitable for long-term use and cost-effective.
- Unique 3D Precision Weaving Technology for constant, superior filtration.
- More, deeper pleats for large filtration surface. Cleanable and reusable.

# SIMOTA URETHANE AIR FILTER

AIR FILTER

## HEAT SHIELD

PC MATERIAL HEAT-SHIELD ENDURES HIGH TEMPERATURE UP TO 280°C

- BELL SHAPED CAP
- STRONG GALVANISED STEEL MESH W / BRIGHT EPOXY COATING
- DEEP PLEATS / 3DPRECISION WEAVING TECHNOLOGY INCREASES 20% FILTRATION AREA
- HIGH FLOW FILTER ELEMENT WITH FILTRATION PROTECTION
- THE SHIELD REDUCES HEAT BUILD-UP. FEEDS ONLE COOL AIR INTO THE ENGINE
- EXTREME BUILT-IN VELOCITY STACK
- HIGH GRIP DESIGN FOR PERFECT FITMENT

The SIMOTA heat shield air filter is a universal cold air intake system incorporating a cleanable / reusable. SIMOTA High-Flow Air Filter. The shield reduces heat build-up feeding only cool air to your engine, resulting in improved volumetric efficiency and increased power gains. It allows for updating your intake system while retaining a closed environment.

#### Replacement Filter Elements

\*Hot high performance car parts! Gain HP with this high performance intake air filter.

Replacement Filter Elements are available in oil-resistance proof construction. The impregnated with our unique type is standard in Spiral Straight-Fin or Hexagonal Honeycomb model reloaded intake kits, and is designed for superior filtration while still providing excellent airflow. The foam is made up of new patent formula in Racing Suction kits and is focused on maximizing airflow for performance and protection, yet still keeping harmful particles from the engine.

## AERO FORM III

SIMOTA INNOVATIVE AERO FORM AIR INTAKE SYSTEM Engineered to replace the restrictive factory air box and piping, the Simota Aero Form Intake System feeds the engine with maximum air flow with filtration protection. Simply experience good torque at lower RPM range and almighty! top end horsepower at higher engine revving-with great sound The air vent collects denser cold air coming directly from outside, achieving idea air intake temperature with ram-effect induction.

### AERO FORM II

Base on our prestigious Aero Form Intake System, the enforced induction effect is strengthened by incorporating Simota's patented Twin Charger technology. Varied Length and Diameter of Piping with Venturi Effect.

INTAKE SYSTEM

### CARBON CHARGER INTAKE SYSTEMS

are equipped with the patented Simota Twin Charger Technology, simply engineered to breathe like never before.

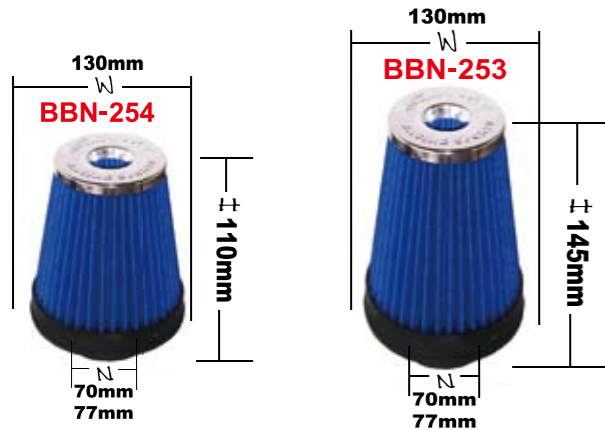

Features:

Boots horsepower and torque Improves engine's efficiency to increase 3-10 horsepower Minimal noise & heat-insulation 100% handmade.

The unique six-blade helical air-intake device inducts high-pressure airflow into the cylinders to enhance horsepower and fully utilizes gasoline. Double air induction enforces the air intake.

100% HANDE-MADE AND 100% CARBON FIBER  
ENHANCE HORSEPOWER UP TO 3-10 HP  
Custom / Made Simota Filter

INTAKE SYSTEM

# AIR INTAKE SYSTEM

## SHARK

Shark carbon fiber intake systems are SIMOTA newest revolution air Special design for volume more air, also replacing the air filter to get entire air path to the engine. It's very unique design and got the best result.

Dry carbon kit, 100% by handmade particular surface.

By replacing the air filter to get entire air path to the engine.

Special inside space volume for more air storage space, enhance torque power and horse power in best function.

By high quality silicone with 4 layer of reinforcement nonwoven. It is durable, anti-heat, anti-oil, anti-expansion, and anti-pressure

## CARBON FIBER AERO FORM INTAKE SYSTEM

Our advanced aero form air intake system is 100% Carbon fiber intake kit is all 100% handmade. With Simota's Carbon fiber aero form air intake system, the horsepower increases more than 5~12 hp dramatically

**Features:**

- ▶ Boost horsepower and torque
- ▶ Improves engine's efficiency
- ▶ Heat insulation & forced induction to generates more external cold air
- ▶ Lighter and Stronger
- ▶ 100% handmade
- ▶ Prevents engine to accumulate the carbon jams effectively, therefore the gasoline fully utilizes and creates the maximum performance.

# AIR INTAKE SYSTEM

## HEXAGON MUSHROOM INTAKE SYSTEM

Available for universal applications, the unique design of SIMOTA HEXAGON MUSHROOM SIMOTA SPIRAL MUSHROOM combats the typical stock design that generates turbulence and reduces airflow capacity when the propensity of airflow moves toward surface areas. SIMOTA HEXAGON MUSHROOM /SIMOTA SPIRAL MUSHROOM is made up of a fine foam which offer an optimal balance of air filtration and increased airflow for maximum performance and protection. SIMOTA's unique-funnel design, with its vacuum-inducing inner horn, draws air from the filter's outer edge and directs air away from inlet throat surface areas.

SIMOTA HEXAGON MUSHROOM is made up of a fine foam which offers optimal balance of air filtration and increased airflow for maximum performance and protection.

SIMOTA's unique-funnel design, with its vacuum-inducing inner horn, draws air from the filter's outer edge and directs air away from inlet throat surface areas.

The outer frame is a hexagonal honeycomb design, which helps improving air intake's. The performance of air intaker honeycomb-like and the colorful outlooking can dress up engine compartment.

# 3in1 Performance Oil Filter

Honeycomb spiral column design helps oil form Super Oil Vortex therefore it increases oil pressure of the engine.

Stainless Steel Mesh with pleats provides superior oil filtration thus increase work efficiency of the engine oil flow, oil flow rate, and decreases. It not only increases the horse power and torque but also saves cost and fuel.

### Installation Notices:

1. Apply oil to sealing gasket face before instaling.
2. When gasket makes contact with sealing face, tighten with appropriate tool.
3. To check for oil leaking after installation.

NISSAN	65mm	(1300C.C-2000C.C)

1. Improved fuel economy
2. Instant increase in engine power
3. Reduction in carbon accumulation to your engine
4. Minimized air pollution
5. Enhanced throttle response and acceleration
6. Easy to install, DIY

**Instruction**

1. Location of installation: Install the product between the air filter and the throttle body, into the middle of air inlet pipe. (Propeller side face to the air filter)
2. Optimal location: Install the product 10 cm to 30 cm in front of the inlet throttle body.
3. When the inlet pipe is curved, you can install Super Spiral into the middle of dual bend pipe.
4. If the car is equipped with air flow sensors(AIF), install a Super Spiral before or after AIF with the same size. When there is minor difference in size, you can wrap a few rounds of tape on outer rim.
5. The products can be installed to gasoline & diesel cars, as long as there is the inlet pipe on the air inlet of the throttle.

SIMOTA'S high speed SUPER SPIRAL creates a vortex air flow to improve air & fuel mixture enhancing your engine's performance. It reduces the carbon accumulation in the engine and substantially increases the horsepower to your engine.

SUPER SPIRAL TURBO VENTILATOR blades are made of advanced precision bearing technology (running up to 30,000 RPM). Aluminum Alloy Gravity Diecasting design is not only anti-rust, but also has the ability to match your high-revving engine.

The blades have special angles to promote extra air flow to the inlet manifold and assist in providing better engine combustion. Experience strong torque during low to medium RPM ranges but also extreme horsepower at higher engine revolutions.

The upgraded fuel combustion can reduce carbon accumulation to your engine. Furthermore, it is environment friendly and greatly increases performance efficiency.

### SIMOTA SILICONE COUPLER

is made of high quality silicone with 4 plies of polyester fabric. SIMOTA SILICONE COUPLER is not only more durable, but also gifted with the ability of anti-heat, anti-oil, anti-expansion, and anti-pressure. SIMOTA SILICONE COUPLER makes you driving safely even though driving long for distance on high speed .

## OIL CATCH TANK

OIC CATCH TANK

The Simota oil catch tank adds to the PVC line made of lightweight real carbon and aluminum alloy. It serves as an effective reservoir to collect oil that is introduced into the system and to prevent it from entering the intake. Turbocharged cars especially need an active way to remove crankcase vapors, and keeps the engine oil cleaner for a longer service interval.

Stainless-Steel / Nonwoven Fabric (Epoxy Resin)  
High-Flow Air Filter ~Select for the Market! OEM is available.

SIMOTA stainless-steel stock replacement air filter is renewable racing air-filter element, made of special stainless steel, with a unique EPDM frame. They stainless-steel mesh features 200 x200 mesh, and is corrugated to form air induction walls with depth of 18 – 25mm, ensuring to form the powerful air flow from out of the car effectively.

It increases surface area to promote air flow, and as a result, can increase engine horsepower by 7%. This air filter features high hardness, corrosion resistance, and cold / heat resistance, and is applicable under any climates and driving environments.

It ensures extended engine operating life, and will require no replacement at all. It only needs to be oiled with SIMOTA Air Filter Cleaner and Oil Kit once every 5,000 kilometers.

The stainless-steel air filter is suitable for long-term use and cost-effective.

SIMOTA's nonwoven fabric ( epoxy resin) stock replacement air filter greatly increases air intake volume and the air intake efficiency of engines.

It is designed for use of both non-oiled and oiled conditions, and is more dust-absorptive than original air filter models.

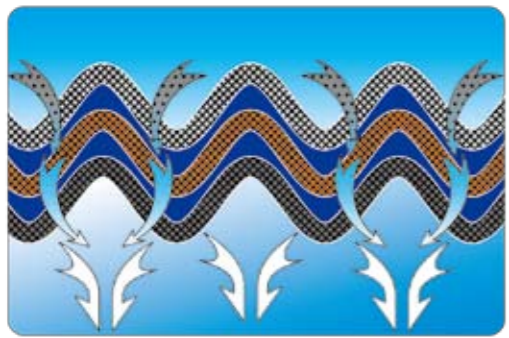

Our replacement air filter could extend engine operating life and smooth the air intake, also it increases horsepower by 5% at least. Customized and OEM air filters are available for clients.

**PRODUCT ANALYSIS**  
**Stainless-Steel / Nonwoven Fabric (Epoxy Resin)**  
**High-Flow Air Filter~ Select for the Market!**

It is designed for use of both non-oiled and oiled conditions, and is more dust-absorptive than original air filter models.  
 Our replacement air filter could extend extended engine operating life and smooth the air intake, also it increases horsepower by 5% at least.

1. Made of unique EPDM frame
2. One-piece extrusion molded
3. Extremely lightweight
4. Strong structure

*Non-woven fabric element*

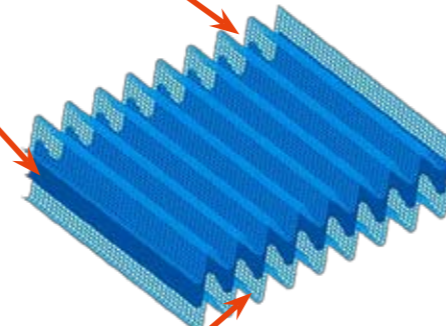

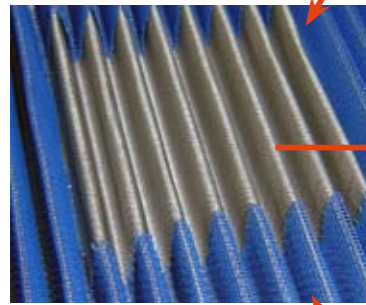

*Stainless steel (200 × 200mesh)*

**Strong galvanised steel mesh coated with epoxy**

**Non-woven fabric element**

**Strong galvanised steel mesh coated with epoxy**

SIMOTA stainless-steel stock replacement air filter is renewable racing air-filter element, made of special stainless steel, with a unique EPDM frame. They stainless-steel mesh features 200 × 200 mesh, and is corrugated to form air induction walls with depth of 18 – 25mm, ensuring to form the powerful air flow from out of the car effectively.  
 It increases surface area to promote air flow, and as a result, can increase engine horsepower by 7%.  
 This air filter features high hardness, corrosion resistance, and cold / heat resistance, and is applicable under any climates and driving environments. It ensures extended engine operating life, and will require no replacement at all. It only needs to be oiled with SIMOTA Air Filter Cleaner and Oil Kit once every 5,000 kilometers.  
 The stainless-steel air filter is suitable for long-term use and cost-effective. SIMOTA's nonwoven fabric ( epoxy resin) stock replacement air filter can greatly increase air intake volume and the air intake efficiency of engines.

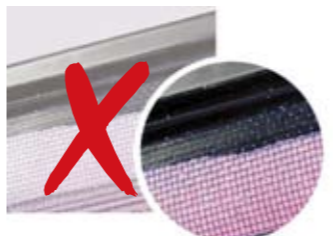

SIMOTA filters are made of light yet durable rubber compound and with better filtration surface for the same application.

12mm-16mm rubber infringement of Manufacturer E significantly reduces the filtration area. Besides, the filter is obviously over-weight that adds excessive load to the car.

The filter of Manufacturer X is not one-piece extrusion molded. Due to the poor technology and the terrible structure, it may endanger the driving safety.

The exposed aluminum net significantly shows its poor quality. Manufacturer K's filter frame has fragile rubber structure...

The "X" brand's stainless steel air filter is attached with glue-on method in its production process. It can be easily peeled off after enduring of heat. IF the rubber piece falls off and caught in engine valve, the car will have difficulty to slow down in time. This could have resulted in severe damage and harm...

Poor rubber structure of Manufacturer K can be easily melts under engine heat which cause distortion therefore suffers from air leakage and resulted in inferior filtration.

## Welcome OEM and ODM Project !!

### Advantage:

- 1. Most durable air filter in the world**  
By one piece form mold technology, we ensure our products can bear the temperature range from -30°C ~ 150°C.
- 2. Increase at least 20% filtration space than other regular air filters.**  
Specialized in products skills, more deeper pleats to have more space to get air in.
- 3. Extra lightweight, cleanable and reusable.**  
Made of polyurethane construction, strong galvanized steel mesh coating simply demonstrated good appearance, and the weight is trimming down around 39% from the regular air filters.

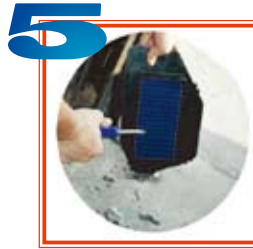

# SIMOTA®

www.simota.com

**1** Take off the air filter inside stock intake box, which is either stabled by screw or buckled by tenon. If you have trouble removing it, please go to an authorized dealer close by for help.

**5** Let it dry naturally or use the air gun to dry it.  
\*Do not use any other drying method could damage the filter\*

**2** Use the air gun briefly clean the dust and dirt attached on the surface of the filter.  
\*The unique material of SIMOTA's mesh can sustain the pressure released form all general air gun\*

**5** Apply by spraying a proper amount of SIMOTA Air Filter Oil evenly on the filter.  
\* Do not OVER-OIL-AIR FILTER. Over-oiling may interfere with the proper performance of the engine.\*

**3** After cleaning the surface, apply by spraying a proper amount of the SIMOTA Air Filter Cleaner evenly on the filter.  
\*the use of other cleaner for example detergent, bleach, and solution, could damage the filter.\*

**7** After waiting minutes for the oil to be absorbed into the filter mesh, install the filter back to the intake box. Be sure the crew is stabled or the tenon is buckled.

**4** Allow cleaner to soak into the filter mesh, and than use the air gun to clean it. Repeat Step 3 and Step 4 until all traces of cleaner are gone.

## Performance / Feature

Service the filter at least every 5,000 kilometers to maintain optimum performance.

We commend that the filter be serviced more often on off-road and high-performance street applications. Always inspect your filter whenever you change your oil.

OC-01

OC-02

**USE ONLY SIMOTA AIR FILTER CLEANER AND OIL KIT.**

**USE FO OTHER BRADS ARE NOT COMMENDED AND MAY VOID YOUR WARRANTY.**
